

## MPERIA® OEM

# Reduce Time to Market While Removing Integration Headaches

MPERIA OEM is the ideal solution for machine builders who desire marking and coding integration in their equipment; it allows full control from within their user interface in an incredibly cost effective manner.

**Reduced integration costs**  
with a common API across all Matthews Marking Systems' products including drivers for 3rd party equipment - enables one-time integration regardless of technology

**Unparalleled support**  
with Matthews' application engineering, engineered solutions team, and technical support all ensuring the fastest, most reliable integration into your machine design

**Open source scripting**  
allows the creation of plugins suited to your specific needs and applications

**Multiple interfaces & protocols**  
for any type of integration; from databases to PLC systems (XML, Command line, Ethernet, Serial, Ethernet IP, etc)

**Seamless print data integration**  
from customer's ERP, MES, and other systems with netFolder

**Remote control UI**  
with standard VNC allows remote management of the user interface from within your application or host interface
