

# MPERIA®

## Remove Integration Headaches and Plant Operator Pain While Reducing Human Error

**A single user interface**  
and common API across all Matthews Marking Systems technologies with the ability to control 3rd party equipment

**Full scalability**  
with ability to add additional marking equipment as well as open source scripting and plugins for 3rd party control

**No middleware required**  
for seamless database integration (ERP, MES, & other systems) with netFolder

**Pain-free networking**  
with multiple APIs (XML, Ethernet IP, and more) tailored to your application needs

**Reduced capital investment**  
with print validation integration - measuring, sensing, motion control, camera setup

**Effortless support**  
with remote control troubleshooting via VNC or secure cloud connectivity

**Error reduction**  
with automated message control from a single location

**Benchmark security & data integrity**  
with complete control of data access through netFolder
